- note paper and pen
- Registration includes refreshments and workbook
- Registration begins: 7:30 am
- Seminar: 8:00 am to 5:30 pm
- Class size limited to the first 50 registrants.
- Completion Certificates will be presented to attendees.

Who Should Attend?

This one-day seminar describes the responsibilities of the designer, installing contractor and the authority having jurisdiction for proper installation of sprinkler systems in dwellings. This seminar is limited to one/two family dwellings and manufactured homes. This is a basic level seminar.

It is most beneficial to building and fire officials, designers, sprinkler system installation contractors, architects, engineers, dwelling owners, insurance representatives, and real estate professionals.
